

## ABR 75/25 Volatility Fund

**Institutional Class: VOLSX**

**Investor Class: VOLJX**

**Target:** Seeks long-term capital appreciation

**Use for:** Liquid alternative investment; long and short volatility exposure

### Dynamic Allocation

Seeks to generate favorable long-term risk-adjusted returns, in part, by profiting from price changes involving instruments that track volatility levels. Relies principally on models to determine allocations among (i) long exposure to CBOE Volatility Index ("VIX Index") futures and VIX Index exchange-traded products ("ETPs"); (ii) short exposure to VIX Index futures and VIX Index ETPs; (iii) long exposure to S&P 500 Index futures and S&P 500 Index ETPs; (iv) long exposure to long-term U.S. Treasury securities, and (v) cash.

### Objective

Long-term capital appreciation

### AVERAGE PORTFOLIO EXPOSURE (%)<sup>1</sup>

<sup>1</sup>Portfolio composition was determined each day using end-of-day NAV and the closing prices of each holding. The daily values of each Exposure category were then averaged from 07/01/2025 through 09/30/2025.

<sup>2</sup>Includes money market fund, income/expense accruals and receivables/payables.

### FUND STATISTICS

Inception Date	8/3/2020
Ticker Symbol	VOLSX

### GROWTH OF A HYPOTHETICAL \$10,000 INVESTMENT

The graph assumes the reinvestment of dividends and capital gains but does not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares. Performance would have been lower without expense limitations in effect. Returns represent past performance and do not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Mutual fund performance changes over time and currently may be significantly lower than stated above. For the most recent month-end performance, please call 855-422-4518.

<sup>3</sup>The Adviser has contractually agreed to waive fees and/or reimburse expenses until November 30, 2025.

### Risk Disclosure

The return on and value of an investment in the fund will fluctuate in response to market movements. Investments are subject to market risks, such as rapid increase or decrease in investment value or liquidity, fluctuations in price due to economic conditions and other factors beyond the control of the Adviser.

As with any mutual fund, there are risks involved with investing in the ABR 75/25 Volatility Fund, including the possible loss of principal. The Fund invests in derivative instruments, and a small investment could have a large potential impact on the performance of the Fund. The Fund's investments may appreciate or decrease significantly in value over short periods of time, which in turn may cause the Fund's net asset value per share to experience significant increases or declines over short periods of time. The loss on a short futures contract is unlimited since the appreciation of the shorted asset also is unlimited. The Fund may have to raise cash to meet variation margin requirements on its futures contract holdings; if the Fund has insufficient cash, it may have to sell investments at a time when it might be disadvantageous to do so. Other risks specific to the Fund are detailed in the prospectus.

**Standard Deviation** is a historical measure of volatility; a higher number indicates greater volatility. **Sharpe Ratio** is a risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the fund's historical risk adjusted performance. A variation of the Sharpe Ratio is the **Sortino Ratio**, which removes the effects of upward price movements to measure only return against downward price volatility. The **CBOE Volatility Index** measures the expected volatility of the S&P 500 Index. The **S&P 500 Index** is a market value-weighted index representing the performance of 500 widely held, publicly traded large capitalization companies. The **FTSE 3-Month U.S T-Bill Index** is an unmanaged index representing monthly return equivalents of yield averages of the last 3-month Treasury Bill issues. All returns reflect reinvested dividends and capital gains distributions. One cannot invest directly in an index.

The Fund is distributed by Foreside Fund Services, LLC
